

MIKIMOTO

Neck-Decollete and Hand Cream

produced by
MIKIMOTO COSMETICS

Luxurious skin radiating a lustrous* shimmer reminiscent of pearls

Just as jewellery makes your skin luminous,
so should your skin illuminate your jewellery.

It is this concept of mutually uplifting beauty that inspired
the Mikimoto Neck-Decollete and Hand Cream.

Our unique formula is tailored especially toward
the neck, decollete and hands, whose skin structure
differs from that of the face. This helps achieve glowing skin,
which also has elasticity. Velvety to the touch, it blends
into your skin effortlessly, and imparts a sense of
luxuriousness in everything from its mystical,
pearl-like fragrance to the comfort of its touch.

Lustrous* skin that makes your jewellery shimmer

•We utilize a unique formula to make your neck, decollete and
hands alluringly beautiful. Your skin will feel richly moist, with a
supple, elastic texture.

•Achieve clear, glowing skin* that frames your jewellery gorgeously.

Sense of luxuriousness that you will feel deep inside

•Luxuriant to the touch, our cream sinks deep inside your skin and
imparts a lustrousness* each time you use it.

•Envelop your skin in its mystical aroma, reminiscent of Mikimoto
Eau de Parfum's pearl-like fragrance.

*Refers to a sheen.

Please make sure to always keep the attached scoop clean before use.

You may also use it standing up, as pictured.

Instructions for use

Using the attached scoop, place a drop of cream (about the size of a
single large pearl) into your hand, and rub it gently into your neck
and decollete. Apply to the right side using your left hand, and vice
versa.

When using a product to protect against ultraviolet rays, please do
so after the cream has been worked thoroughly into your skin.

Take another drop of cream the size of a large pearl, and rub it
gently into your hands.

Be sure to apply frequently if you feel your skin becoming dry
during the daytime.

Instructions for use (before putting on jewellery)

Take a drop of cream (about the size of a single large pearl), and
rub it gently into your hands.

Be sure to apply frequently if you feel your skin becoming dry
during the daytime.

Continue gently rubbing the cream into your neck and decollete.
Apply to the right side using your left hand, and vice versa. Before
putting on jewellery, press the applied area lightly with your palm
and gently rub any remaining cream into your skin.

When using a product to protect against ultraviolet rays, please do
so after the cream has been worked thoroughly into your skin.

Note:

•Please make sure to pay close attention to any potential skin
reactions when using this cream. The following symptoms may
occur when a cosmetic product is not suitable for the skin, and in
such cases, we ask that you please discontinue use immediately:

Skin irregularities including reddening, swelling, itching,
irritation, color loss (white patches), darkening, etc. that occur
at the time the cream is applied, or when subsequently coming
into contact with direct sunlight.

Symptoms may worsen if the cosmetic product continues to be
applied, and in this case, we recommend that you consult a skin
doctor.

•In the case of irregularities such as wounds, swelling, eczema,
irritation, soreness, etc., please discontinue usage in that region of
the skin.

•Please take care not to get the cream into your eyes. Should this
occur, do not rub it in. Instead, immediately wash out the affected
eye with cool or warm water. Should pain or the feeling of a
foreign object remaining in the eye continue even after washing,
please consult an eye doctor.

•Please do not store the cream in an area with excessively hot or
cold temperatures, or with direct sunlight.

•Please make sure to close the cap tightly following each use.

•Please keep cream in an area where children are not able to reach it.

◇An allergy test on this product has been completed.

(We cannot guarantee, however, that allergies to this product will
not occur.)
